

Papers submitted to **Geochronometria** should be concerned with methods of absolute dating. The scope of **Geochronometria** extends over a wide range of studies in the area of absolute chronology and their application in different fields of earth and other natural sciences, including archaeology.

The manuscripts must **contain original work** which is not published elsewhere in any medium by the authors or anyone else and is not under consideration for publication in any other journal or medium. This restriction does not apply to review articles.

Submitted papers will be reviewed by one or two referees and the editor's decision about acceptance or rejection is final.

The submitted works **are focused on the aims and scope of the journal** and present research in dating technique development as well as applications of those.

The manuscripts **should be correctly written in a clear manner** and they should contain all essential features of a complete scientific paper. The language of the journal is English.

The manuscripts **should be delivered in electronic format** submitted via email send to grzegorz.adamiec@polsl.pl along with an attached covering letter. The covering letter should contain all important details about the submission such as: submitter's full name, the full and short title of the article, full list of authors, status of the article, i.e. whether it is a new submission or a corrected version, e-mail address and contact address, telephone/fax numbers, number of attached files, details of any previous or concurrent submission, recommendations of reviewers for the Editor, as well as any other relevant information.

Instructions for Authors

The papers, including all figures, tables and references, should be no longer than 40 double spaced manuscript pages and should contain the minimum number of figures, tables, references, etc., necessary for the proper understanding of the text. Tables should be easy to edit. We recommend that all files are in total not larger than 3 MB.

Generally no text formatting is allowed except for double-spacing, empty lines to single out headings numbered in Arabic numerals, indentation to mark new paragraphs (no empty lines between paragraphs), and relevant usage of capitals and italics in the reference list.

The first text page should contain the **title** of the paper, the **name(s)** of the author(s), their **institutional addresses** with the e-mail address of the corresponding author, **key words** separated by semicolons, a **running head** and an **abstract**. The abstract, no longer than 200 words, should be informative and contain the main findings and conclusions.

The main text of the article should contain a formulation of the problem, an indication of the approach taken, a report on the data and observations, proposed interpretations and discussion, and the conclusions reached.

The list of **references** should be double-spaced, indented after the first line, with full journal titles, number of pages and DOI number when available. For example:

Bøtter-Jensen L, Bulur E, Duller GAT and Murray AS, 2000. Advances in luminescence instrument systems. *Radiation Measurements* 32(5-6): 523-528, DOI 10.1016/S1350-4487(00)00039-1.

'RoS' Gliwice Radiocarbon **DataBase RoS, 2004**. WEB site: <http://www.carbon14.pl/IB_Grdb/>. Accessed 2005 June 14.

Kozydra K and Skompski S, 1995. Unikalne stanowisko interglacjalnego eemskiego w Ruskówku na Pojezierzu Kujawskim (Unique character of the Eemian Interglacial site in Ruskówek, Pojezierze Kujawskie, central Poland). *Przegląd Geologiczny* 7: 572-575 (in Polish).

Kvasov DD, 1975. *Pozdnechetvertichnaya istoriya krupnykh ozer i vnutrennih morei Vostochnoi Evropy* (Late Quaternary History of Large Lakes and Inner Marine Basins of Eastern Europe). Leningrad, Nauka: 278pp (in Russian).

Arthur MA, Schlanger SO and Jenkyns HC, 1987. The Cenomanian-Turonian anoxic event, II: Palaeoceanographic controls on organic matter production and preservation. In: Brooks J and Fleet AJ, eds, *Marine Petroleum Source Rocks*. Geological Society Special Publication, London, 26: 401-420.

References in the text should be of the form: (Berger *et al.*, 1987; RoS, 2004; Kozydra and Skompski, 1995; Kvasov, 1975 and Oldfield and Appleby, 1984). English translations of non-English titles should be provided in brackets after the original titles.

Figure captions and **Table captions** should be listed after the references. The captions should be numbered in Arabic numerals (i.e. "**Figure 1**", "**Table 1**"). References to figures in the text should be indicated as "**Fig. 1**" and "**Table 1**", respectively.

Figures, in digital form (in a scalable format), should be prepared not to exceed the page size (233 x 172 mm) after size adjustment to the width of column (82 mm) or page (172 mm). Figures should be numbered sequentially with Arabic numerals. Figures should not be included in the text. All maps, sketches, profiles, etc., must have a metric bar scale shown. We generally do not recommend publishing physical maps. The proposed location of figures and tables may be indicated in square brackets in the text. In some cases, originals of figures may be requested. All photographs should be numbered as figures. Please do not number the photographs separately as Plates. Authors are responsible for obtaining from copyright holder the permission to reproduce any figures for which copyright exists. In the electronic version of *Geochronometria* plots, photographs and maps may be printed in colour. In the printed version only black and white figures will be printed, however, the editorial board may decide in exceptional circumstances to print photographs and maps in colour. In the case where colour versions will appear in the electronic version and black and white in the printed version, authors are requested to submit figures in both forms. Colour illustrations can be used free of charge used in the electronic version, however, in the printed version, the author will be charged with additional costs of colour printing.

Volumes up to no. 37 of *Geochronometria* remain available free of charge (at www.geochronometria.pl).
